DETAILED ACTION

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian McGuire on 05/19/2010.

The application has been amended as follows:

- In claim 9, line 1, "A computer-readable" has been changed to --A non-transitory computer-readable--
- In claim 10, line 1, "A recording" has been changed to --A non-transitory recording--
- In claim 16, line 1, "A computer-readable" has been changed to --A non-transitory computer-readable--
- In claim 17, line 1, "A recording" has been changed to --A non-transitory recording--
- Claims 11-13, 16, and 49-50 have been canceled.

Allowable Subject Matter

Claims 1-17, and 25-34 are allowed.

The following is an examiner's statement of reasons for allowance:

With regard to independent claims 1-3, 8-11, 15-17, 25, 30, and 34, the prior art of record fails to show or reasonably suggest the claimed invention taken as a whole with respect to acquiring and analyzing user setting parameters for resolution and noise suppression, selecting optimal procedures about image and sound quality based on the analyzing, and providing users with a new product or a circuit board having a new function of the optimal procedures.

Prokopenko of record discloses collecting and analyzing user preferences in order to recommend programming to a user. Zomaya of record discloses analyzing a computer configuration and recommending an upgrade to a target configuration, and Candelore of record describes monitoring user activity in order to recommend upgrading to a programming package; however the combination fails to disclose analyzing user settings of resolution and sound, and recommending an upgraded product or circuit board based on those user settings. Zomaya merely describes upgrading to a target configuration; however this upgrade is not based on user settings of resolution and sound.
